

## How to Make Tissue Paper Flowers

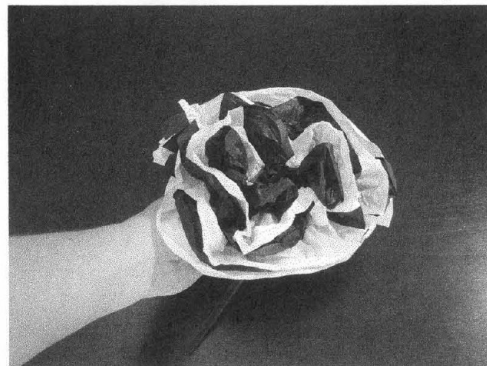

1. Take square pieces of tissue paper measuring 12" x 12" and create six layers. You can use different colors to create a variety of flowers. Fold accordion style.

2. Take the middle of the pipe cleaner and place it in the middle of the tissue paper. Wrap the two sides of the pipe cleaner around tissue and twist together tightly to create a stem.

3. Fan out the tissue paper toward the middle and gently pull the layers of the paper up and toward the center to create a flower.

4. Voila! A beautiful paper flower.
